

BAK Code of Conduct and Academic Integrity

Ethical Expectations for Online Coaching

Document Classification: Internal Training and Policy Reference

Purpose: This document is prepared as part of a knowledge base for a Retrieval-Augmented Generation capstone prototype. It is not a substitute for statutory advice, legal consultation, or official government notifications.

Code of Conduct

This policy sets behavioural expectations for tutors, academic coordinators, content contributors, administrative personnel, and learners participating in BAK programmes.

- Maintain respectful communication in online and offline interactions.
- Avoid discriminatory remarks based on gender, background, language level, religion, caste, income, disability, or region.
- Do not make false promises regarding scores, migration, employment, or guaranteed outcomes.
- Protect learner data, assessment records, and personal documents.
- Use AI tools ethically and disclose AI-assisted drafting where relevant to internal work.

Academic Integrity

Learners may use digital tools for practice, but final submissions for evaluation must reflect their own effort. Tutors may demonstrate AI tools for language improvement but should ensure learners understand grammar, logic, and structure rather than mechanically copying outputs.

BAK Principle: AI may accelerate learning, but it must not replace learning.

Disciplinary Response

Minor issues should first be addressed through warning, counselling, or clarification. Serious misconduct such as harassment, document misuse, repeated payment default, abusive behaviour, or deliberate academic fraud may lead to suspension or termination of service, subject to fair review.
