

BAK Data Privacy and AI Use Policy

Responsible Handling of Learner Data and RAG Knowledge Sources

Document Classification: Internal Training and Policy Reference

Purpose: This document is prepared as part of a knowledge base for a Retrieval-Augmented Generation capstone prototype. It is not a substitute for statutory advice, legal consultation, or official government notifications.

Data and Document Handling Policy

BAK handles learner data such as names, contact details, educational goals, score reports, resumes, writing samples, and payment information. This policy defines responsible handling of such data.

- Collect only information necessary for academic or administrative purposes.
- Do not share student documents with third parties without consent.
- Store sensitive documents in controlled folders with restricted access.
- Use student samples for demonstration only after removing personal identifiers unless explicit consent is given.
- Delete or archive obsolete data according to operational need and legal requirement.

AI and RAG Use Policy

For the capstone prototype, institutional PDFs are used as a knowledge base for retrieval and question answering. The system should answer only from available documents where possible and should clearly state when information is not available in the uploaded material.

RAG Safety Principle: retrieve first, answer second, and avoid inventing institutional policy when the source document does not support it.

Confidentiality

Tutors and administrators must treat student resumes, migration goals, exam attempts, marks, and financial discussions as confidential. Internal access should be limited to those who require the information to provide the service.
